

Obsidian Renewables LLC

Press Release

November 18, 2020

Obsidian Renewables, LLC is pleased to announce that Ken Dragoon has accepted the position of Director of Hydrogen Development. Ken is the founder of the Renewable Hydrogen Alliance, a Portland-based group that promotes development of renewable electricity to produce ultra-low carbon hydrogen for a wide range of energy uses. Please visit <https://renewableh2.org/> for more on RHA.

Prior to founding the Renewable Hydrogen Alliance, Ken worked for 35 years in the utility and electric power industry, including 15 years with renewable resources.

Obsidian Renewables is a long-established Oregon developer of utility-scale solar projects, with a recently completed 47 MW project at the Lakeview Airport and another 400 MW project, Obsidian Solar Center, in development in Lake County. Please visit <http://www.obsidianrenewables.com/> for more on Obsidian's solar projects. Obsidian is also a founding member of the Renewable Hydrogen Alliance and is expanding its focus to develop green hydrogen as the next important step in decarbonizing the transportation and industrial sectors. We welcome Ken and his expertise on renewable hydrogen to further these projects.
